

GOVERNMENT OF KARNATAKA

No. FEE 316 EPC 2015

Karnataka Government Secretariat
M.S. Building
Bangalore, dated:19.01.2016

Notification

Whereas, Tanks/Lakes both in Urban and rural areas were serving as source of drinking water to people, animals and birds and helped in increasing the fertility of the lands through controlling soil erosion which in turn enhanced the agricultural production. Tanks served as habitat for aquatic fauna boosting fish production and most importantly increasing the ground water table. Lakes are considered as lung spaces of cities and help moderate vagaries of climate and maintenance of ambient temperatures. Construction activities, destruction of tanks and wetland systems have added to the deterioration of urban environment.

Whereas, siltation, pollution, encroachment of Raja Kaluves, construction of apartments and entry of untreated sewage into the tanks, have resulted in deterioration to the level of hyper eutrophication state in many Tanks / Lakes in the urban areas. The services that the tanks were rendering earlier are vanished in Bengaluru and other urban areas. Such tanks lakes are contrarily posing threat in many ways and causing environment and health hazards.

Whereas, the foams and ignition phenomena observed in the Bellandur Amani Lake and Varthur Lake in Bengaluru in the recent past are the manifestations of severity of the problem.

Whereas, the inspection and monitoring by the Central Pollution Control Board and the Karnataka State Pollution Control Board reveals that the following are the chief causes for deterioration of water quality in the said lakes.

1. Increasing discharge of untreated wastewater containing abnormal quantity of organic matter, phosphorus, oil & grease, chemicals from detergents & cleaners etc. over a long period and its settlement as sediment.

ಸಿ. ಕೆ. ಪಾಟೀಲ
22/1/16

2. Oil and grease from industrial activity, sewage and garbage have accumulated in sewer lines and in some parts of Lake. Due to heavy rains, the oil & grease accumulated in the sewer lines and storm water drains, etc. have been flushed to the surface of the lake.

Whereas, the State Government in exercise of powers conferred under 18 (1) (b) of the Water (Prevention and Control of Pollution) Act 1974 have issued direction to the Karnataka State Pollution Control Board vide the Notification No. FEE 22 EPC 2009 (P-1), dated: 04.08.2010 to exempt the residential and commercial construction of less than 20,000 Square meter built up area from the consent mechanism within the sewerage areas wherein permission from Bangalore Water Supply and Sewerage Board (BWS&SB)/ BBMP/ Municipalities / Corporations is obtained to discharge sewage in sewer lines and charges paid to these authorities.

Whereas, the Central Pollution Control Board Vide No.A-19014/41/2006-MON/1242, dated:22.05.2015 have under section 18 (1) (b) of the Water (Prevention and Control of Pollution) Act 1974 directed the Karnataka State Pollution Control Board to ensure that all apartments with more than 50 units shall treat sewage in their own STPs and reuse the treated sewage within its premises.

Whereas, the Karnataka State Pollution Control Board has a mandate to comply with the directions issued by the Central Pollution Control Board under Section 18 (1) (b) of the Water (Prevention and Control of Pollution) Act, 1974.

Whereas, the Karnataka State Pollution Control Board vide latter No.PCB/CNP/10/GEN/15/277, dated:13.10.2015 have submitted the proposal to the Government for issue of direction under Section 5 of the Environment (Protection) Act, 1986 to the concerned Planning Authority i.e Bangalore Development Authority (BDA) and Bruhath Bengaluru Mahanagara Palike (BBMP) to insist for installation of STPs in Residential Apartments with 50 units and above irrespective of existence of sewer line and for treatment of sewage to urban reuse standards and to reuse the same within their premises.

Whereas, it is opined that establishment of sewage treatment plants in Group Housing Projects, Commercial Establishments and such other Institutions help in prevention of pollution of water bodies apart from reducing the fresh water demand in such establishments as Bangalore is facing shortage of fresh water supply by BWS&SB.

Wherefore, in order to ensure treatment of sewage generated in the Group Housing Projects, Commercial Establishments and such other Institutions and to ensure reuse of treated water for non-potable purposes apart from ensuring prevention of pollution of lakes and other water bodies, the State Government hereby issue direction under section 5 of the Environment (Protection) Act, 1986 in exercise of the powers delegated to the State Government vide Notification No.S.O.152 (E), dated: 10.02.1988 to the Authorities listed in the Table-1 below as mentioned against each of such authorities.

Table - 1

Sl. No.	Designation of the Authority issued with the direction under section 5 of Environment (Protection) Act, 1986	Direction under section 5 of Environment (Protection) Act, 1986
1	2	3
